ATOMOS | MONTHLY SOCIAL MONITORING 01 - 30 OCTOBER 2026

30-DAY OBSERVED ENGAGEMENT & SOURCE EVIDENCE

Monthly preview: 01-30 October 2026 (Pakistan time). Evidence compiled from saved repository records only; no new research performed.

Daily source files available: 1 of 30 (2026-10-30). Missing days are incomplete coverage, NOT zero brand mentions.

KPI interpretation: counts describe source records captured, not total platform activity. Reddit cross-posts cover one issue cluster. Blank engagement means not measured.

PLATFORM ANALYTICS | OBSERVED PUBLIC ENGAGEMENT

Views, likes, comments, reactions, reposts and shares are public post-level observations ONLY where original sources or approved APIs supplied numeric values. Missing means not available, never zero. Post views are not unique website visitors or conversion traffic. Third-party website sessions, referral visits, impressions and campaign conversions require the owner's authorized analytics property or verified data export.

ORIGINAL URL: www.reddit.com/r/videography/comments/1xegbe9/atomos_shinobi_7_ii_advertised_as_4k60_but_only/

Source image not cached or accessible. Do not substitute a fabricated preview.

Source excerpt: I purchased the Atomos Shinobi 7 II choosing it based on its advertised specifications

Finding: Customer says Shinobi 7 II packaging advertised 4K UHD 60, while later online specifications showed 4K30. Customer reports support said hardware cannot enable 4K60. Public replies discuss UI, ghosting and image concerns. These are user allegations, not an independently established technical finding.

Suggested response: Review customer support case and published technical specifications.

Date evidence: Original Reddit post dated Saturday October 24 2026

Verification: Original public post date and brand context checked; one issue cross-posted in multiple subreddits.

COMMENT 1 | r/videography commenter
Reported that the monitor's image has ghosting and the UI is difficult to use; first-hand assessment from a purchaser, not verified lab testing.

COMMENT 2 | r/videography commenter
Tested Shinobi 7 II with Lumix S1II and reported a 4K60 camera output displaying UHD 29.97 on the monitor; discussed HDMI downconversion.

COMMENT 3 | r/videography commenter
Discussed historical dissatisfaction with Atomos service and Shogun hardware support.
